

To Whom it May Concern,

I was notified recently that there is a proposal to expand the LPFM service, which would take priority over current FM translator service. I would like to encourage the FCC to NOT allow this to happen.

I listen to AIR 1, a Christian radio station, in which I've learned has hundreds of thousands of listeners who hear AIR 1 through the FM translators. AIR 1 and it's sister station, KLOVE, are what we listen to on the radio. With young children, I know that what they hear is always positive and uplifting. There is not another radio station that I have the same kind of freedom to listen to with my children and have no worries about what they might hear. AIR 1 supports communities by providing us with not only music, but advice and tools to raise my family and help my marriage, which in turn, betters our community.

AIR 1 is in the business of helping people, and it would be a shame to let this community and communities everywhere be without this service. With so many choices of radio stations, the choices are really few.

Please do not let this service be disregarded. Thank you for your time.

Sincerely,

wendie Canfield
